4轮驱动小车底盘双层 安装教程

1.收到货后先把小车所有材料打开,得到如下图所示的基本配件:

2. 现在开始安装,拿到电机马达先把测速码盘装上,如下图所示,4个电机都要装好:

3. 把小车板上保护膜撕掉(看个人喜好也可不撕掉起保护作用),撕掉当然更加美观好看。然后拿到一块板安上电机固定支架紧固件,如下图:

4. 放上电机马达然后扭上螺丝扭紧固定好,如下图:

5. 固定好一个电机展示。如下图红圈内标注是剩下 3 个电机安装位置,就接着继续安装上

6. 安好 4 个电机展示图,接着把 4 个轮子装到电机上如下图所示,到此这块板上安装结束,继续往下看另一块板安装支撑铜柱

7. 上面装好后,拿到这块板如下图扭上螺丝安上支撑铜柱,图⑩红圈为剩下铜柱安装位置:

8. 铜柱安装好后就把板盖上,重叠对准孔位放入另块板上(就是前面已装好马达轮子的板),如下图①红圈标注所示,再扭上板下面螺丝就安装完成了,就这么简单。

下面为撕掉保护膜展示图:
